

Re: national fundraiser
Kenmerk: ssh-2012-

Utrecht,

The Save Home Foundation would like to draw your attention to a national collection of empty ink cartridges and toners for fundraising. With this collection we hope to gain the means to finance a Save Home on the Maluku Islands, a home where children who are victims of sexual abuse can be sheltered.

Other than that we hope to contribute to a better environment with this collection. It is initiated by the TitanE Foundation.

The TitanE Foundation is a national organisation for “Sustainable Development and Poverty Reduction” on the Maluku Islands. To achieve their goals, TitanE works together with 21 Maluku organisations operating in the field of development aid. Together they form the Maluku National TitanE Network. The Save Home Foundation belongs to the TitanE Network.

Because of the changing situation with regards to development projects (funding cut-backs), we are forced to become more inventive about gathering funds for our projects and activities. The collection of ink cartridges and toners is one of our new activities.

We thank you on behalf of the Maluku children for your willingness to cooperate in this matter and hope that you will be willing to collect your cartridges for us. The collected empty ink cartridges and toners are offered to recycling companies, for a price. The price is depending on the type of cartridge/toner. All proceeds will go to the Save Home Foundation.

The contact person for the collection project is Frans Palyama
